

## Health Screenings

Parents are responsible for monitoring their student's health status prior to the start of school and for keeping their student at home should they present any symptoms of illness.

Staff will visually screen for symptoms of illness.

- All students will enter at the 3 established entry points and will have their temperature taken by an assigned staff member.
  - Non-touch thermometers will be utilized. Students and staff with temperatures equal to or higher than 100.4 will be sent home and instructed to monitor symptoms and follow the return to school protocol.
- During the daily temperature check upon campus entry, the school staff will make a visual inspection of the student for signs of illness which could include flushed cheeks, coughing, rapid breathing or difficulty breathing (without recent physical activity), or fatigue.

Any student or staff member exhibiting signs of illness must stay home.
